

April 21, 2025

To our valued customers:

Good day!

This is to inform you that starting May 2, 2025 until May 30, 2025, the Nuclear Analytical Techniques Application Section will not receive any samples for all nuclear analytical services. The NATA Section will be hosting several events during the month, including an international workshop, and will require both NATA Section laboratories and personnel.

Acceptance of samples for nuclear analytical services will resume on June 1, 2025.

We apologize for the inconvenience this may bring on your end.

Yours truly,

RAYMOND J. SUCGANG, R.Ch., MPM
Section Head / Laboratory Manager
Nuclear Analytical Techniques Application Section
